Canon DSLR Camera Control in Space BackyardEOS is the most used tool for controlling Canon DSLR camera in space. It is a Swiss knife that will take care of most needs, but it is also versatile enough to do things that other applications can't do.

BackyardEOS gives you complete control of your Canon DSLR camera in space. You can control the camera to take pictures, record movies, monitor what the camera is seeing, take astronomical photos, do astrophotography, and the list goes on. You will be able to take pictures like no other camera, plus with BackyardEOS you will be able to see exactly what the camera sees.

Simply put, BackyardEOS is the best solution for controlling your Canon DSLR camera in space. You don't have to install anything on your computer. You don't have to be an expert at using the software. You don't have to learn anything new. BackyardEOS has several features that make it easier to use in space. It is a self-contained program that works with a few clicks, so it is very user-friendly. Features BackyardEOS has four major features that are worth looking at: Camera Control: The very first feature that you will see when you start using BackyardEOS is the Camera Control window. This is where you will see everything that is going on with your camera. You will be able to see the picture being taken, the status of the focus, the exposure, and the camera settings. Movie Recording: The second feature is the Movie Recorder. This is where you can take a series of photographs in a row. You can have a timelapse video, a video of the moon, the stars, or even a sky movie. Just choose a time interval and let BackyardEOS take care of the rest. The process is similar to taking a regular picture, but instead of having a photo, you have a movie. Astrophotography: The third feature that you will see is the Astrophotography window. This is where you will be able to take pictures like you never thought you could before. You can take detailed pictures of the stars, planets, and galaxies. You can capture hundreds of pictures of the stars, and maybe even capture a picture of the Earth at the same time. BackyardEOS can adjust the color of the sky to fit the colors of the 82157476af
